A Clean Hands Class

Describe what all of the children are doing in the classroom. Why is it important for them to clean their hands when they are done? Color in the picture. Be sure to draw a picture of yourself in the classroom too.

Help Children Learn

Knowing when and how to use antibacterial wipes is an important part of learning how to fight germs. Discuss the pictures together. Talk about why it’s important to have clean hands before eating or playing. Discuss what might happen if you didn’t clean your hands after blowing your nose or using the bathroom. Invite the child to talk about other times it would be important to use Wet Ones antibacterial wipes.
